Expertise

A computer Engineer with 5+ years in web development, experience with HTML, CSS and JavaScript. Proven ability to fully use and apply standards, principles, theories, and concepts related to technical discipline and a clear understanding of version control (Git) and code documentation, passionate about contributing to an organization focused on continuously improving consumer experiences.

EXPERIENCE

Senior Web Developer
Valexhub, Lagos, NG
DECEMBER 2022 – JUNE 2024

- Lead and manage web development projects from conception to completion, ensuring timely delivery and adherence to project specifications.
- Write, review, and optimize high-quality, maintainable code. Establish and enforce coding standards and best practices across the development team.
- Contribute to the development of the technical roadmap and make recommendations on the adaptation of new technologies and methodologies.
- Mentor and guide junior and intermediate developers, providing technical advice, code reviews, and fostering a culture of continuous learning.
- Work closely with product managers, designers and other stakeholders to gather requirements and translate them into technical specifications and architecture.
- Design and implement robust, scalable and secure architectures for web applications.
- Lead the development of testing strategies, including unit, integration, and end-to-end tests. Diagnose and fix complex bugs and performance issues.
- Create and maintain comprehensive documentation for code, APIs, and system architecture to facilitate knowledge sharing and onboarding of new team members.

Intermediate Web Developer
GFCL Academy, Lagos, NG
JULY 2021 – NOVEMBER 2022

- Stay up-to-date with the latest web development trends, tools, and best practices, and incorporate this knowledge into the curriculum and development project.
- Guide and supervise students in their individual and group projects, ensuring they apply learned concept and follow best practices in their work.
- Provide technical support to students and faculty for any issues related to web development tools and platform used in the academy.

- Organize and lead workshop, hackathons, and other events to provide hands-on learning experiences for students and foster a community of practice.
- Work closely with other instructors and educational staff to integrate web development topics into interdisciplinary projects and ensure consistency across the curriculum.
- Collect feedback from students on the courses and teaching methods and work with the educational team to continuously improve the quality and effectiveness of instruction.

Junior Web Developer

Inspire Vocational Academy, Lagos, NG

SEPTEMBER 2019 – JUNE 2021

- Make each responsive to different screen sizes.
- Assist in the creation and maintenance of websites using HTML, CSS, JavaScript, and relevant frameworks.
- Write clean, efficient, and well-documented code under the guidance of senior developers.
- Conduct test and debug code to ensure websites function correctly across different browsers and devices.
- Work with designers, developers, and project managers to bring website concept to life.
- Perform routine site maintenance and updates to ensure the stability and security of the websites.
- Continuously improve your coding skill and stay updated with the latest web development trend and technologies.
